Background

International Law in Practice is a four-day programme run by the British Institute of International and Comparative Law (BIICL), which provides a broad introduction to key issues in international and comparative law – from public to private and from commercial to human rights.

Who?

BIICL is an independent legal research institute with charitable status, unaffiliated to any university, undertaking applied research, publications, training and events. This course is led by many of the Institute's leading researchers and practitioners, the course is ideal for those in the early years of legal practice, those working in governmental and non-governmental organisations with legal elements to their work, and students who are about to commence a postgraduate degree in aspects of international law.

Why?

International law is now a part of the practice of almost every lawyer today. Knowledge of treaty obligations arises in taxation issues and European law disputes, as well as government interactions; awareness of the responsibilities and immunities of government entities can be at the heart of a commercial contract and a human rights action; understanding of the applicable law and the laws of different states is relevant to matrimonial, commercial and competition issues; and the appropriate forum for resolving a dispute is necessary to discern for an investment matter as much as a humanitarian and rule of law concern. There are few areas of legal practice that are not affected in some way by international law, whether that matter is transacted or litigated in a national, regional or international location.

This course is unique in that it introduces participants to international law, as broadly understood and as it arises in practice. It includes the core elements of public international law, such as treaties, customary international law, state responsibilities and immunities, human rights and humanitarian law, as well as how international law is dealt with in national law and in terms of dispute settlement. It also encompasses the areas where international law operates in aspects of law previously considered outside the public areas, such as commercial transactions and personal affairs, which include private international law, comparative law, competition law and international economic law, as well as key aspects of European law and the rule of law.
