

## **Act LVII of 1996**

### **on the Prohibition of Unfair Trading Practices and Unfair Competition**

The public interest attached to having a competitive market environment that best serves the economy and social progress, as well as the interests of the companies operating in observation of the requirements of integrity in business dealings as well as that of consumers, requires for the State to lay down legal facilities to ensure the fairness and freedom of economic competition. This requires the introduction of competition laws so as to prohibit trading practices that disregard the requirements of fair competition or that have the capacity to restrict competition, and prevent the concentration of companies as they are detrimental to competition, providing also for the required organizational and procedural requirements. With a view to achieve these goals, Parliament has adopted the following Act, taking into account the requirement of integration into the legislative framework of the European Community and the traditions of national competition laws:

The market conduct displayed by companies abroad, other than the forms of conduct regulated in Chapters II and III, shall also fall under the scope of this Act, if the effect of such conduct may manifest itself within the Republic of Hungary.

(2) For the purposes of Articles 81 and 82 of the Treaty establishing the European Community (hereinafter referred to as "EC Treaty"), the market conduct governed under these articles shall be subject to the procedural regulations of this Act where the Office of Economic Competition or the Hungarian court has jurisdiction pursuant to Council Regulation (EC) No. 1/2003 on the implementation of the rules on competition laid down in Articles 81 and 82 of the Treaty (hereinafter referred to as "EC Regulation 1/2003").

  - d) it acquires the ability to assert major influence over the decisions of the other company.
- (3) For the purposes of this Act, a company shall be deemed to have indirect control over another company when the latter is controlled, whether independently or jointly, by one or more companies under the control of the former.
- (4) For the purposes of this Act, the activities of a liquidator or receiver shall not be considered as control.
- (5) For the purposes of this Act, 'business unit' shall mean the assets or rights, including clients and customers, that, if acquired, enable the acquiring company to enter a market by itself or together with the assets and rights at its disposal.

### *Section 24.*

- (1) Authorization from the Office of Economic Competition shall be required for the merger of companies if the combined net sales revenue of all groups of companies involved (Subsection (5) of Section 26), and the net sales revenues of the companies controlled jointly by members of the groups of companies involved with other companies in the previous financial year exceeded fifteen (15) billion forints, and among the groups of companies involved there are at least two groups with net sales revenues of five hundred million forints or more in the previous year together with the net sales revenues of companies controlled by members of the same group jointly with other companies.
- (2) The five-hundred-million-forint threshold shall cover the mergers - that took place during the two-year period preceding the merger and which were not subject to authorization - between companies that used to be part of the group that lost control due to the merger with companies of the group that acquired control.
- (3) In connection with the merger of insurance companies, the value of the gross insurance premiums shall be taken into account instead of the net sales revenue. For the merger of investment service providers and investment funds, the revenue from investment services and membership fees, respectively, shall be taken into account. In connection with the merger of credit institutions and financial enterprises the following items of income shall be taken into account instead of the net sales revenue:

  - b) income from securities:

- ba) income from shares and other variable yield securities,
- bb) income from participating interests,
- bc) income from shares in affiliated companies,

- e) other operating income.

#### *Section 25.*

The temporary (not to exceed one year) acquisition of control or assets by an insurance company, credit institution, financial holding company, mixed-activity holding company, investment firm or property management organization shall not be deemed a concentration, if such acquisition is made in preparation of resale, and if control is not exercised, or it is limited to an extent that is absolutely necessary. The Office of Economic Competition may authorize the extension of the said one-year period if the company in question provides proof that alienation could not be accomplished within one year.

#### *Section 26.*

(1) The companies concerned are the companies involved directly and indirectly in the concentration.

(2) Direct participants are the ones between whom the concentration arises.

(3) Indirect participants are other members of the group of companies [Subsection (2) of Section 15] in which the direct participant is also a member.

(4) In the course of determining the circle of direct participants, those whose right of control terminates as a result of the merger shall be disregarded.

(5) 'Group of companies concerned' means any direct participant under Subsection (2), plus the indirect participants with which it is affiliated in accordance with Subsections (3) and (4).

#### *Section 27.*

(1) For the purposes of Subsection (1) of Section 24, in the course of calculating net sales revenues, the turnover between the companies concerned (Section 26) or between the divisions thereof shall be disregarded.

(2) In the course of calculating the net sales revenues of (non-resident) companies whose corporate domicile is abroad, the net sales revenues generated in the previous business year from the goods sold in the territory of the Republic of Hungary shall be taken into account.

(3) In calculating the net sales revenues of the companies concerned, under the majority control of the State or by local self-governments, that company comprising a business unit shall be taken into account which has an independent right of decision-making in respect of defining its market policy.

(4) In respect of the alienation of business units, the net annual revenue of the previous year received by the company from the utilization of assets and rights shall be taken into consideration.

(5) The net sales revenues of a company under joint control shall be divided equally among the controlling companies, whereupon the companies of the same group shall be treated as a single entity for the purposes of calculating the controlling share.

#### *Section 28.*

(1) In the case of merger or fusion, the direct participant or, in all other cases, the party acquiring the business unit or direct control must - as prescribed under Section 24 - apply for authorization.

(2) The application for authorization shall be submitted within thirty (30) days from the publication of the public invitation to tender, the conclusion of the contract, or the acquisition of the right of control, whichever occurs earlier.

(3) In the case of the concentration of credit institutions as well as of insurance companies, the application for authorization shall be submitted to the Office of Economic Competition simultaneously with the application for the permit of the supervisory agency defined in specific other legislation.

#### *Section 29.*

The authorization of the Office of Economic Competition is required for the conclusion of a contract resulting in a concentration as defined in Section 24.

#### *Section 30.*

(1) Applications for authorization shall be adjudged upon weighing the advantages and disadvantages resulting from the concentration, such as in particular:

a) the structure of the relevant markets; the existing or potential competition, the purchase and sales opportunities on the relevant markets; the costs and risks, as well as the technical, economic and legal requirements for entering into and exiting from, the market; the foreseeable impact of a concentration upon competition in the relevant markets;

b) the market position and strategy of the companies concerned, their economic and financial capability, their business policy, their competitiveness on national and foreign markets, and any expected changes therein;

c) the effect of concentration upon the suppliers, the intermediate and final consumers.

(2) The Office of Economic Competition may not refuse to grant authorization if, with regard to the contents of Subsection (1), the concentration does not create or intensify a dominant position in so far as to prevent the development, maintenance or expansion of effective competition in the relevant market (Section 14) or in a considerable segment thereof. If the purpose or effect of setting up a company jointly as defined in Paragraph c) of Subsection (1) of Section 23 is the implementation of concerted practices among the group of companies, the merger shall be adjudged in accordance with Section 17.

(3) In the interest of reducing the disadvantageous effects of concentrations, the Office of Economic Competition may render its authorization contingent upon prior or subsequent conditions; in particular, certain obligations, such as having to alienate certain business units or other assets within a prescribed deadline; or the termination of control over a company that is indirectly involved.

(4) If authorization is granted as contingent upon any prior condition, it shall become operative once the condition has been satisfied. An authorization contingent on any subsequent condition shall become operative when it is granted; however, it shall be cancelled if the condition is not satisfied.

(5) The scope of authorization granted for concentrations shall cover the restrictive market practices necessary for the implementation of such concentrations.

#### *Section 31.*

If, in the course of a competition control procedure, it is established that a concentration that has been implemented without authorization (which, according to Section 24, requires

authorization) could not have been authorized, the Office of Economic Competition, in order to restore effective competition, may prescribe the separation or alienation of the merged companies or assets and business units, the termination of joint control, or some other obligation within the deadline prescribed.

#### *Section 32.*

(1) The Office of Economic Competition shall revoke its decision adopted on the basis of Section 30 if:

a) granting of the authorization in a decision not reviewed by the court is based upon the misleading communication of a fact of import for the purposes of making the decision; or

b) the obliged company has failed to perform any of the obligations stipulated in the decision.

(2) The Office of Economic Competition may amend its decision passed on the basis of Section 30 if the obligor has failed to perform any of the obligations or is unable to satisfy any of the conditions laid down in the decision for reasons that are not attributable to him.
