Legal Foundations of International Monetary Stability provides a systematic and thorough study of how national, European and international developments have dramatically changed the dynamic field of monetary law over the last decades.

Melding historical, economic and legal ideas, Lastra examines this through three main parts: beginning with the notion of monetary sovereignty, the author goes on to analyze the concept of monetary stability and the institutional developments to promote it, in particular independent central banks and currency boards. The stability of the financial system and the institutional design of supervision are also considered.

The second part of the book covers European monetary law, the history of monetary integration in Europe, the institutions of monetary union and the challenges confronting EMU. Through the third part, the international monetary system, its history and institutions, with emphasis on the law of the International Monetary Fund, is examined.

This new text fills a gap in the current public international law literature for a systematic and comprehensive text on the international monetary and financial system and is essential reading for academics and practitioners in the field of monetary law.

Rosa María Lastra, Senior Lecturer in International Financial and Monetary Law, Centre for Commercial Law Studies, Queen Mary, University of London

- Examines the foundations of international monetary law, with a detailed analysis of the law of the IMF and the law of the European Central Bank
- Describes the legal framework promoting, and policy implications of monetary and financial stability
- Systematic treatment of national, European and international developments in monetary law and related aspects of financial regulation
- Presents the framework for the prevention and resolution of financial crises, nationally and internationally
- Essential reference for lawmakers, central bankers, bank supervisors, academics and practitioners specializing in this field, and legal and policy planning staff in internationally active financial institutions
